TITLE	Report on Enrollment, Fall 1985. California Community Colleges.
INSTITUTION	California Community Colleges, Sacramento. Office of the Chancellor.
PUB DATE	Jun 86
NOTE	148p.; Prepared by the Research and Analysis Unit.
PUB TYPE	Statistical Data (110) -- Reports - Research/Technical (143)
EDRS PRICE	MF01/PC06 Plus Postage.
DESCRIPTORS	Academic Achievement; *Community Colleges; Demography; *Enrollment; Profiles; State Surveys; *Student Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS	*California

ABSTRACT

Drawing from the Student File of the Chancellor's Office Information System, this report profiles the demographic and academic characteristics of nearly 1.2 million actively enrolled students in the California community colleges during fall 1985. The report is divided into three sections of tables. Section I aggregates student counts and characteristics by district, while section II offers a parallel presentation for colleges. These tables focus on number and percent of full-time, part-time, and noncredit students; student gender and ethnicity; age; credit enrollment by credit unit workload attempted; weekly student contact hours for regularly scheduled census credit classes and total potential hours of attendance for positive attendance classes. In section III, district enrollment data are examined by type of student (i.e., full-time, part-time, and noncredit), including information on gender and ethnicity, age, high school completion status, level of academic achievement, enrollment status, residency status, citizenship status, and student goal. PREFACE

This is the third in a series of Chancellor's Office reports profiling California community college students. Data in this report are aggregated by college and district and provide a basis for analysts and policymakers to compare levels and changes in student demographic and educatonal characteristics. While there is no "typical" community college student, this document seeks to statistically describe the multi-facted characteristics of these students.

We wish to thank district personnel for their cooperation in submitting student data to the Chancellor's Office. It is only through the efforts of all districts that a report such as this is possible. District staff should review these tables, not only for purposes of perfecting data submissions in the future, but also to make suggestions to us for improving the usefulness and/or the presentation of the data. Comments should be directed to the Research and Analysis Unit of the Chancellor's Office at (916) 445-0104. Copies of the Fall 1983 and 1984 Enrollment Reports also can be obtained from the Research and Analysis Unit.

Leonard Shymoniak of the Research and Analysis Unit, analyzed the data and prepared the various computer programs that produced the summary tables. Jerry Hudson and Elizabeth Kamrar of the Management Informaion Services Unit worked with district staff in the collection of the raw data and performed the data processing and maintenance functions.

Chuck McIntyre
Director of Research and Analysis

June, 1986

INTRODUCTION

This report profiles the demographic and academic characteristics of California community college students for the Fall 1985 term. The database for the report is the Student File of the Chancellor's Office Information System. This file is a census of the nearly 1.2 million students actively enrolled as of the first attendance accounting period for each of the colleges in the system. This file is used to generate reports required by federal and state agencies along with a variety of policy analyses and planning efforts. Data were submitted by all 70 districts.

The report is divided into three sections, each consisting of a series of tables. Section I aggregates student counts and characteristics by district while Section II is a parallel presentation for colleges. In Section III, district data are categorized by full-time, part-time and noncredit status (Element SE4).[1] Students are defined as full-time if they carry 12 units or more, and part-time if they attempt less than 12 units but more than zero units. Students enrolled in zero credit units are labeled as noncredit. In all tables, unknowns for variables other than unit status are excluded for purposes of computing percentage distributions.

Each section presents data on student gender, ethnicity and age. Sections I and II also make use of the elements: units attempted, weekly student contact hours (WSCH) and total potential hours of attendance (TPHA).

Age (Element SE1) is computed from the student's birthdate. The code for gender (Element S10) indicates whether the student is male, female, or unreported. Ethnicity is a code (Element S8) representing the student's racial or ethnic background. A student may be American Indian or Alaskan Native, Asian or Pacific Islander, Black, White, Hispanic, Filipino, Other (persons not fitting into any of the previous categories), or Non-respondent (the item is left blank).

The element, units attempted (Element SE7), is defined as the total number of units of credit generated by credit courses in which a student is actively enrolled as of the first census. The tables present the number and percentage of students enrolled in each credit unit group. Credit enrollment is a count of the total number of students taking one or more credit courses in that district or college. That is, students enrolled in both credit and noncredit classes are labelled 'credit' whereas those enrolled exclusively in noncredit classes are labelled 'noncredit'.

WSCH (Element S17) is the total number of hours which a student spends in class during the first census week. WSCH is reported only for those students who are actively enrolled in full-term census courses offered for credit. Total Potential Hours of Attendance (TPHA) (Element S14) is another measure of contact hours. TPHA is the product of active class enrollments and total scheduled course hours for credit and noncredit, noncensus attendance accounting classes.

---

[1] Refers to data element number of the Data Element Dictionary issued by the Chancellor's Office.

Section III includes the use of five other variables. They are: Type of high school education, student academic level, enrollment status, citizenship status, and student goal.

The type of high school education (Element S5) refers to the kind of diploma or certificate held by the student. The options include high school diploma, G.E.D., certificate of equivalency, certificate of California high school proficiency examination, certificate of completion, and foreign secondary school diploma or certificate of graduation. In addition, the student may not be a high school graduate or the high school degree status may be unknown.

The student's level of academic achievement (Element S13) is determined by the number of credit units completed at an accredited institution prior to registration for the term. Enrollment status (Element S4) is a code which indicates the student's current standing at the reporting college. A new student may be a first-time student or a first-time transfer student. A student who has previously attended the reporting college may be a returning transfer student, a returning student, or a continuing student.

The citizenship status (Element S2) indicates whether or not the student is a United States citizen. If the student is not a citizen, then the kind of visa is noted. Visa types include immigrant, refugee, student, other, and unknown.

The student's goal (Element S12) is the educational aim of the student: transferring to another institution of higher education with or without a degree, aiming for the AA or AS degree in either general or vocational education, or pursuing a certificate or job skills.
